Lead Signal

Qualification + Enrichment

**AI assigns
urgency score**

CRM Object Orchestration

Intelligent Routing & Ownership

Contextual Outreach Sequence

**AI-personalized
outreach**

Conversion Tracking

**AI summarizes CRM
activity for leadership**

The system continuously **scans** fraud-related news for financial institutions experiencing scam incidents, impersonation attacks, or mule network exposure.

Articles are **scored** based on fraud type and severity.

High-priority institutions are pushed into the **CRM** enabling **contextual outbound**

This creates a timing advantage in enterprise outreach.

Public fraud incidents = intent signal

**Detect High-Intent
Fraud Signals**

**Score & Prioritize by
Severity**
